Lake havasu record temperature. How cold does it get in lake havasu. How hot is lake havasu city. Lake havasu city climate data.

For more than 20 years Earth Networks has operated the world's largest and most comprehensive weather observation, lightning detection, and climate networks. We are now leveraging our big data smarts to deliver on the promise of IoT. By integrating our hyper-local weather data with Smart Home connected devices we are delivering predictive energy efficiency insight to homeowners and Utility companies. Considerable cloudiness. A stray shower or thunderstorm is possible. High 102F. Winds SSE at 10 to 15 mph.Mainly cloudy. Low 87F. Winds ESE at 5 to 10 mph.A few clouds. Low 87F. Winds ESE at 5 to 10 mph.Partly cloudy skies. High 104F. Winds SSE at 5 to 10 mph.A few clouds from time to time. Low around 90F. Winds ESE at 5 to 10 mph.Moonrise7:03 pm Sunset: 7:43 pmFor the rest of Wednesday, the temperature will vary between the highest temperature of 102.2°F (39°C) and the lowest temperature of 91.4°F (33°C). Day: 20% | Night: 20% Precipitation Day A 20 percent chance of showers and thunderstorms. Mostly sunny, with a steady temperature around 101. South wind 8 to 10 mph. Night A 20 percent chance of showers and thunderstorms. Mostly cloudy, with a low around 89. East southeast wind 7 to 13 mph. High 104°F Low 90°F Wind 9mph SE Precipitation Day: 30% Night: 20% Sunrise 5:44 am Sunset 7:43 pm Summary DayA 30 percent chance of showers and thunderstorms, mainly before 8am. Partly sunny, with a high near 104. Southeast wind 7 to 9 mph. NightA 20 percent chance of showers and thunderstorms. Mostly cloudy, with a low around 90. East southeast wind 7 to 10 mph. High 103°F Low 89°F Wind 10mph S Precipitation Day: 30% Night: 20% Sunrise 5:45 am Sunset 7:43 pm Summary DayA 30 percent chance of showers and thunderstorms, mainly before 11am. Mostly sunny, with a high near 103. South wind 7 to 10 mph. NightA 20 percent chance of showers and thunderstorms. Partly cloudy, with a low around 89. High 105°F Low 88°F Wind mild Precipitation Day: 20% Night: 10% Sunrise 5:45 am Sunset 7:42 pm Summary DayA 20 percent chance of showers and thunderstorms. Mostly sunny and hot, with a high near 105. NightA slight chance of showers and thunderstorms. Partly cloudy, with a low around 88. High 104°F Low 88°F Wind mild Precipitation Day: 10% Night: 10% Sunrise 5:46 am Sunset 7:41 pm Summary DayA chance of showers and thunderstorms. Partly sunny, with a high near 104. NightA chance of showers and thunderstorms, mainly after 11pm. Partly cloudy, with a low around 88. 14 Day Trend Here is your temperature trend for the next 14 Days. To see the daily forecast, scroll to the table below. No Photo Found. This AfternoonA 20 percent chance of showers and thunderstorms. Mostly sunny, with a steady temperature around 98. South southeast wind around 10 mph. TonightA 20 percent chance of showers and thunderstorms. Mostly cloudy, with a low around 89. East wind 7 to 13 mph. ThursdayA 30 percent chance of showers and thunderstorms, mainly before 9am. Partly sunny, with a high near 102. Southeast wind 7 to 9 mph. Thursday NightA 20 percent chance of showers and thunderstorms. Mostly cloudy, with a low around 90. East southeast wind 7 to 10 mph. FridayA 30 percent chance of showers and thunderstorms, mainly before noon. Mostly sunny, with a high near 102. South wind 8 to 10 mph. Friday NightA 20 percent chance of showers and thunderstorms. Mostly sunny, with a low around 89. SaturdayA 20 percent chance of showers and thunderstorms. Mostly sunny, with a high near 104. Saturday NightA slight chance of showers and thunderstorms. Partly cloudy, with a low around 88. SundayA chance of showers and thunderstorms, mainly before noon. Partly sunny, with a high near 102. Sunday NightA chance of showers and thunderstorms, mainly after midnight. Partly cloudy, with a low around 88. MondayA slight chance of showers and thunderstorms. Mostly sunny, with a high near 104. Monday NightA slight chance of showers and thunderstorms. Partly cloudy, with a low around 89. TuesdayA slight chance of showers and thunderstorms. Mostly sunny, with a high near 104. Tuesday NightA slight chance of showers and thunderstorms. Partly cloudy, with a low around 88. WednesdayA slight chance of showers and thunderstorms. Mostly sunny, with a high near 104. In Lake Havasu City, the summers are sweltering, the winters are cool, and it is dry and mostly clear year round. Over the course of the year, the temperature typically varies from 45°F to 110°F and is rarely below 37°F or above 116°F. Based on the beach/pool score, the best times of the year to visit Lake Havasu City for hot-weather activities are from mid May to early July and from late August to early October. The hot season lasts for 3.6 months, from June 1 to September 18, with an average daily high temperature above 101°F. The hottest month of the year in Lake Havasu City is July, with an average high of 109°F and low of 85°F. The cool season lasts for 3.1 months, from November 19 to February 23, with an average daily high temperature below 74°F. The coldest month of the year in Lake Havasu City is December, with an average low of 46°F and high of 66°F. AverageJanFebMarAprMayJunJulAugSepOctNovDec High 67°F72°F79°F87°F96°F106°F109°F110°F107°F97°F87°F75°F66°F Temp. 55°F59°F66°F74°F83°F93°F98°F106°F113°F114°F4.4h14.4h14.2h13.4h12.3h11.3h10.3h9.9h The earliest sunrise is at 5:24 AM on June 12, and the latest sunrise is 2 hours, 20 minutes later at 7:44 AM on January 7. The earliest sunset is at 5:26 PM on December 5, and the latest sunset is 2 hours, 27 minutes later at 7:53 PM on June 28. Daylight saving time (DST) is not observed in Lake Havasu City during 2022. The figure below presents a compact representation of the sun's elevation (the angle of the sun above the horizon) and azimuth (its compass bearing) for every hour of every day in the reporting period. The horizontal axis is the day of the year and the vertical axis is the hour of the day. For a given day and hour of that day, the background color indicates the azimuth of the sun at that moment. The black isolines are contours of constant solar elevation. The figure below presents a compact representation of key lunar data for 2022. The horizontal axis is the day, the vertical axis is the hour of the day, and the colored areas indicate when the moon is above the horizon. The vertical gray bars (new Moons) and blue bars (full Moons) indicate key Moon phases. We base the humidity comfort level on the dew point, as it determines whether perspiration will evaporate from the skin, thereby cooling the body. Lower dew points feel drier and higher dew points feel more humid. Unlike temperature, which typically varies significantly between night and day, dew point tends to change more slowly, so while the temperature may drop at night, a muggy day is typically followed by a muggy night. Lake Havasu City experiences some seasonal variation in the perceived humidity. The muggier period of the year lasts for 2.7 months, from July 1 to September 22, during which time the comfort level is muggy, oppressive, or miserable at least 4% of the time. The month with the most muggy days in Lake Havasu City is August, with 5.1 days that are muggy or worse. The least muggy day of the year is March 13, when muggy conditions are essentially unheard of. JanFebMarAprMayJunJulAugSepOctNovDec Muggy days 0.0d0.0d0.0d0.0d0.0d3.3d2.5d1.2d2.0d1.0d0.0d This section discusses the wide-area hourly average wind vector (speed and direction) at 10 meters above the ground. The wind experienced at any given location is highly dependent on local topography and other factors, and instantaneous wind speed and direction vary more widely than hourly averages. The average hourly wind speed in Lake Havasu City experiences mild seasonal variation over the course of the year. The windier part of the year lasts for 8.5 months, from November 10 to July 25, with average wind speeds of more than 7.7 miles per hour. The windiest month of the year in Lake Havasu City is April, with an average hourly wind speed of 8.4 miles per hour. The calmer time of year lasts for 3.5 months, from July 25 to November 10. The calmest month of the year in Lake Havasu City is September, with an average hourly wind speed of 7.1 miles per hour. JanFebMarAprMayJunJulAugSepOctNovDec Wind Speed (mph) 8.28.98.18.48.28.27.87.27.17.47.88.1 The predominant average hourly wind direction in Lake Havasu City varies throughout the year. The wind is most often from the south for 6.7 months, from March 24 to October 16, with a peak percentage of 64% on July 20. The wind is most often from the north for 5.3 months, from October 16 to March 24, with a peak percentage of 48% on January 1. To characterize how pleasant the weather is in Lake Havasu City throughout the year, we compute two travel scores. The tourism score favors clear, rainless days with perceived temperatures between 65°F and 80°F. Based on this score, the best times of year to visit Lake Havasu City for general outdoor tourist activities are from early April to late May and from late September to early November, with a peak score in the second week of October. The beach/pool score favors clear, rainless days with perceived temperatures between 75°F and 90°F. Based on this score, the best times of year to visit Lake Havasu City for hot-weather activities are from mid May to early July and from late August to early October, with a peak score in the second week of June. Methodology For each hour between 8:00 AM and 9:00 PM of each day in the analysis period (1980 to 2016), independent scores are computed for perceived temperature, cloud cover, and total precipitation. Those scores are combined into a single hourly composite score, which is then aggregated into days, averaged over all the years in the analysis period, and smoothed. Our cloud cover score is 10 for fully clear skies, falling linearly to 9 for mostly clear skies, and to 1 for fully overcast skies. Our precipitation score, which is based on the three-hour precipitation centered on the hour in question, is 10 for no precipitation, falling linearly to 9 for trace precipitation, and to 0 for 0.04 inches of precipitation or more. Our tourism temperature score is 10 for perceived temperatures below 50°F, rising linearly to 9 for 65°F, to 10 for 75°F, falling linearly to 9 for 80°F, and to 1 for 90°F or hotter. Our beach/pool temperature score is 0 for perceived temperatures below 65°F, rising linearly to 9 for 75°F, to 10 for 82°F, falling linearly to 9 for 90°F, and to 1 for 100°F or hotter. Definitions of the growing season vary throughout the world, but for the purposes of this report, we define it as the longest continuous period of non-freezing temperatures ( $\geq 32^\circ\text{F}$ ) in the year (the calendar year in the Northern Hemisphere, or from July 1 until June 30 in the Southern Hemisphere). While it does not do so every year, freezing temperatures are seen in Lake Havasu City over some winters. The day least likely to be in the growing season is January 5, with a 76% chance. Growing degree days are a measure of yearly heat accumulation used to predict plant and animal development, and defined as the integral of warmth above a base temperature, discarding any excess above a maximum temperature. In this report, we use a base of 50°F and a cap of 86°F. Based on growing degree days alone, the first spring blooms in Lake Havasu City should appear around January 14, only rarely appearing before January 10 or after January 21. This section discusses the total daily incident shortwave solar energy reaching the surface of the ground over a wide area, taking full account of seasonal variations in the length of the day, the elevation of the Sun above the horizon, and absorption by clouds and other atmospheric constituents. Shortwave radiation includes visible light and ultraviolet radiation. The average daily incident shortwave solar energy experiences extreme seasonal variation over the course of the year. The brighter period of the year lasts for 3.1 months, from April 22 to July 25, with an average daily incident shortwave energy per square meter above 7.5 kWh. The brightest month of the year in Lake Havasu City is June, with an average of 8.5 kWh. The darker period of the year lasts for 3.1 months, from November 5 to February 10, with an average daily incident shortwave energy per square meter below 4.1 kWh. The darkest month of the year in Lake Havasu City is December, with an average of 3.1 kWh. JanFebMarAprMayJunJulAugSepOctNovDec Solar Energy (kWh) 3.44.45.97.38.18.57.87.06.25.03.83.1 For the purposes of this report, the geographical coordinates of Lake Havasu City are 34.484 deg latitude, -114.322 deg longitude, and 738 ft elevation. The topography within 2 miles of Lake Havasu City contains significant variations in elevation, with a maximum elevation change of 673 feet and an average elevation above sea level of 737 feet. Within 10 miles contains significant variations in elevation (4,563 feet). Within 50 miles also contains extreme variations in elevation (8,051 feet). The area within 2 miles of Lake Havasu City is covered by shrubs (52%) and artificial surfaces (45%), within 10 miles by shrubs (91%), and within 50 miles by shrubs (92%). This report illustrates the typical weather in Lake Havasu City, based on a statistical analysis of historical hourly weather reports and model reconstructions from January 1, 1980 to December 31, 2016. Temperature and Dew Point There are 3 weather stations near enough to contribute to our estimation of the temperature and dew point in Lake Havasu City. For each station, the records are corrected for the elevation difference between that station and Lake Havasu City according to the International Standard Atmosphere , and by the relative change present in the MERRA-2 satellite-era reanalysis between the two locations. The estimated value at Lake Havasu City is computed as the weighted average of the individual contributions from each station, with weights proportional to the inverse of the distance between Lake Havasu City and a given station. The stations contributing to this reconstruction are: Needles Airport (KEED, 75%, 26 mi, northwest, 151 ft elevation change) Blythe Airport (KBLH, 19%, 64 mi, south, -344 ft elevation change) Ernest A. Love Field (KPRC, 6%, 109 mi, east, 4,311 ft elevation change) KEED, 75%26 mi, 151 ftKBLH, 19%64 mi, -344 ftKPRC, 6%109 mi, 4,311 ft© Esri, et al. To get a sense of how much these sources agree with each other, you can view a comparison of Lake Havasu City and the stations that contribute to our estimates of its temperature history and climate. Please note that each source's contribution is adjusted for elevation and the relative change present in the MERRA-2 data. Other Data All data relating to the Sun's position (e.g., sunrise and sunset) are computed using astronomical formulas from the book, Astronomical Algorithms 2nd Edition , by Jean Meeus. All other weather data, including cloud cover, precipitation, wind speed and direction, and solar flux, come from NASA's MERRA-2 Modern-Era Retrospective Analysis . This reanalysis combines a variety of wide-area measurements in a state-of-the-art global meteorological model to reconstruct the hourly history of weather throughout the world on a 50-kilometer grid. Land Use data comes from the Global Land Cover SHARE database , published by the Food and Agriculture Organization of the United Nations. Elevation data comes from the Shuttle Radar Topography Mission (SRTM) , published by NASA's Jet Propulsion Laboratory. Names, locations, and time zones of places and some airports come from the GeoNames Geographical Database . Time zones for airports and weather stations are provided by AskGeo.com. Maps are © Esri, with data from National Geographic, Esri, DeLorme, NAVTEQ, UNEP-WCMC, USGS, NASA, ESA, METI, NRCAN, GEBCO, NOAA, and iPC. Disclaimer The information on this site is provided as is, without any assurances as to its accuracy or suitability for any purpose. Weather data is prone to errors, outages, and other defects. We assume no responsibility for any decisions made on the basis of the content presented on this site. We draw particular cautious attention to our reliance on the MERRA-2 model-based reconstructions for a number of important data series. While having the tremendous advantages of temporal and spatial completeness, these reconstructions: (1) are based on computer models that may have model-based errors, (2) are coarsely sampled on a 50 km grid and are therefore unable to reconstruct the local variations of many microclimates, and (3) have particular difficulty with the weather in some coastal areas, especially small islands. We further caution that our travel scores are only as good as the data that underpin them, that weather conditions at any given location and time are unpredictable and variable, and that the definition of the scores reflects a particular set of preferences that may not agree with those of any particular reader. Please review our full terms contained on our Terms of Service page.

Be prepared with the most accurate 10-day forecast for Lake Havasu City, AZ with highs, lows, chance of precipitation from The Weather Channel and Weather.com 14-day weather forecast for Lake Havasu City, Lake Havasu City Temperature Yesterday, Maximum temperature yesterday: 104 °F (at 5:56 pm) Minimum temperature yesterday: 96 °F (at 4:56 am) Average temperature yesterday: 99 °F. High & Low Weather Summary for the Past Weeks Today's and tonight's Lake Havasu City, AZ weather forecast, weather conditions and Doppler radar from The Weather Channel and Weather.com Local Weather Report for Lake Havasu City Arizona, United States. Lake Havasu City Weather Forecast Summary : Today Oct 16th: Sunday Oct 17th: Monday Oct 18th: Tuesday Oct 19th: Wednesday Oct 20th: Sunny; Sunny; Mostly Sunny; Mix of Cloud and Sun; 81°F; 81°F 64°F; 72°F 61°F; 72°F 57°F; 77°F 61°F : Lake Havasu City Detailed ... 21 gio trucv - This report shows the past weather for Lake Havasu City, providing a weather history for the summer of 2022. It features all historical weather data series we have available, including the Lake Havasu City temperature history for the summer of 2022. You can drill down from year to month and even day level reports by clicking on the graphs. Additional information.
